The author, publisher, and affiliates are not liable for any losses or claims from its use. This report does not consider individual objectives, financial situations, or risk tolerance.

What is the nuclear fusion market, in simple terms?

The nuclear fusion market is the reactors, magnets, lasers, and fuel that governments, utilities, and investors fund to make clean power from fusing atoms

We often use a conversational tone, which may sometimes sound a bit informal
We do it on purpose, because it reduces cognitive load and makes slides easier

Where in the world is nuclear fusion money spent?

NORTH AMERICA - 48%

North America leads, with most private fusion startups, the largest rounds raised so far, and the first deals to sell fusion power to tech companies.

EUROPE - 24%

Europe relies on public programs and a few startups, with ITER in France as its anchor and national labs in the UK and Germany behind most of the work.

ASIA-PACIFIC - 21%

Asia-Pacific grows with China and Japan, where the state funds large test reactors and moves faster than most private projects in the West.

LATIN AMERICA - 2%

Latin America has almost no fusion spending yet, outside of a few university research labs in Brazil and Argentina.

MIDDLE EAST & AFRICA - 5%

The Middle East funds a few partnerships with Western startups, mostly to prepare the energy mix that comes after oil and gas.

What is the biotechnology market, in simple terms?

The biotechnology market is the drugs, tools, and lab services built from living cells that pharma groups, hospitals, and labs pay for to treat and test diseases

✅

We often use a conversational tone, which may sometimes sound a bit informal
We do it on purpose, because it reduces cognitive load and makes slides easier

Where in the world is biotechnology money spent?

NORTH AMERICA - 44%

North America leads by far, with Boston and San Francisco as the two main hubs for biotech startups, investors, and big pharma buyers.

EUROPE - 25%

Europe is strong in research, with hubs in the UK, Switzerland, and Germany, but its startups raise less money and often sell out early.

ASIA-PACIFIC - 23%

Asia-Pacific grows fast, led by China and South Korea, which now run many of the world's drug trials and make a growing share of new drugs.

LATIN AMERICA - 4%

Latin America is small and mostly buys drugs and tests made elsewhere, with a few local makers in Brazil and Argentina.

MIDDLE EAST & AFRICA - 4%

The Middle East invests in local production and research centers, while Africa remains a small market that mostly buys from abroad.

The author, publisher, and affiliates are not liable for any losses or claims from its use. This report does not consider individual objectives, financial situations, or risk tolerance.

What is the wearable tech market, in simple terms?

The wearable tech market is the watches, rings, bands, and glasses that consumers, insurers, and employers buy to track health, stay connected, and stay safe

We often use a conversational tone, which may sometimes sound a bit informal
We do it on purpose, because it reduces cognitive load and makes slides easier

Where in the world is wearable tech money spent?

NORTH AMERICA - 33%

North America is the largest market for smartwatches and rings, where people pay more for health tracking and a premium brand.

EUROPE - 26%

Europe buys a lot of fitness trackers and smartwatches, with strong sales in Germany and the UK, and stricter rules on health data.

ASIA-PACIFIC - 30%

Asia-Pacific has the most users, led by China and India, where cheap bands from local brands sell in very large volumes.

LATIN AMERICA - 5%

Latin America buys mostly low-cost bands and older watch models, with Brazil and Mexico as the two largest markets.

MIDDLE EAST & AFRICA - 6%

The Gulf countries buy premium watches and rings, while the rest of the region is still a small market for cheaper bands.

AI VOICE AGENTS

NEW MARKET PITCH

This report is for informational purposes only and is not financial, investment, or legal advice. Do your own due diligence, verify key facts, and consult qualified financial and legal professionals before investing. The author, publisher, and affiliates are not liable for any losses or claims from its use. This report does not consider individual objectives, financial situations, or risk tolerance.

What is the AI voice agents market, in simple terms?

The AI voice agents market is the software that talks on the phone for you, which companies pay for to answer, sell, and book without a human agent

We often use a conversational tone, which may sometimes sound a bit informal
We do it on purpose, because it reduces cognitive load and makes slides easier

Where in the world is AI voice agents money spent?

NORTH AMERICA - 52%

North America leads, since most voice agent startups and their first big customers are in the US, from call centers to clinics and car dealers.

EUROPE - 21%

Europe follows, slowed by language diversity and strict privacy rules that make every rollout longer, even for large companies.

ASIA-PACIFIC - 17%

Asia-Pacific grows with India and the Philippines, where outsourced call centers start to use AI agents for simple calls.

LATIN AMERICA - 5%

Latin America tests voice agents in banks and telecom companies, mostly in Spanish and Portuguese, and often with local partners.

MIDDLE EAST & AFRICA - 5%

The Middle East buys AI agents for government services and airlines, often in Arabic and English, with Gulf states as early buyers.

LONGEVITY MARKET

NEW MARKET PITCH

This report is for informational purposes only and is not financial, investment, or legal advice. Do your own due diligence, verify key facts, and consult qualified financial and legal professionals before investing. The author, publisher, and affiliates are not liable for any losses or claims from its use. This report does not consider individual objectives, financial situations, or risk tolerance.

What is the longevity market, in simple terms?

The longevity market is the tests, clinics, drugs, and supplements that people, clinics, and insurers pay for to stay healthy for longer

We often use a conversational tone, which may sometimes sound a bit informal
We do it on purpose, because it reduces cognitive load and makes slides easier

Where in the world is longevity money spent?

NORTH AMERICA - 41%

North America leads with clinics, tests, and supplements sold directly to people, and most of the venture money in the field.

EUROPE - 28%

Europe follows, with high-end clinics in Switzerland and the UK, a large supplement market, and strong public research in aging biology.

ASIA-PACIFIC - 22%

Asia-Pacific grows with Japan, an aging country that funds research, and Singapore, a hub for studies on healthy aging.

LATIN AMERICA - 3%

Latin America is small, with a few clinics in Mexico and Brazil that mostly serve wealthy local and foreign patients.

MIDDLE EAST & AFRICA - 6%

The Gulf countries invest in longevity research and premium clinics, often with large public budgets and foreign partners.
